A History of Ancient Greek

This peer-reviewed collection of essays provides an account of several current foci of research in Classics. It gathers fifteen contributions covering subjects such as Greek and Latin papyrology and epigraphy. It also includes approaches to various key literary texts, from Homer to post-classical Humanists, in addition to chapters on navigation, coinage, and sculpture. This book represents a useful research tool for a wide range of scholars in Greek, Latin and Ancient History, as well as an up-to-date source for any classicist.

Roman Lives, Corrected Edition

Survey cultural, historical, and linguistic questions surrounding the development of bilingualism in the Roman world.

Rest Lightly

After thirty-five years as a book editor in New York City, Ann Patty stopped working and moved to the country. Bored, aimless, and lost in the woods, she hoped to challenge her restless, word-loving brain by beginning a serious study of Latin at local colleges. As she begins to make sense of Latin grammar and syntax, her studies open unexpected windows into her own life. Along the way, she meets an impassioned cast of characters: professors, students and classicists outside of academia who keep Latin very much alive.

Understanding Roman Inscriptions

The present book collects 31 articles that Jacques van der Vliet, a leading scholar in the field of Coptic Studies (Leiden University / Radboud University, Nijmegen), has published since 1999 on Christian inscriptions from Egypt and Nubia. These inscriptions are dated between the third/fourth and the fourteenth centuries, and are often written in Coptic and/or Greek, once in Latin, and sometimes (partly) in Arabic, Syriac or Old Nubian. They include inscriptions on tomb stones, walls of religious buildings, tools, vessels, furniture, amulets and even texts on luxury garments. Whereas earlier scholars in the field of Coptic Studies often focused on either Coptic or Greek, Van der Vliet argues that inscriptions in different languages that appear in the same space or on the same kind of objects should be examined together. In addition, he aims to combine the information from documentary texts, archaeological remains and inscriptions, in order to reconstruct the economic, social and religious life of monastic or civil communities. He practiced this methodology in his studies on the Fayyum, Wadi al-Natrun, Sohag, Western Thebes and the region of Aswan and Northern Nubia, which are all included in this book.

Classification

Bilingualism has seen an explosion of work in recent years. This volume introduces classicists, ancient historians, and other scholars interested in sociolinguistics to bilingualism in the ancient Mediterranean. The fifteen chapters cover theoretical and methodological issues and key aspects of the contact between Latin and Greek and among Latin, Greek, and other languages.

De Agriculture

This book advances our understanding of the place of Latin inscriptions in the Roman world. It enables readers, especially those new to the subject, to appreciate both the potential and the limitations of inscriptions as historical source material, by considering the diversity of epigraphic culture in the Roman world and how it has been transmitted to the twenty-first century. The first chapter offers an epigraphic sample drawn from the Bay of Naples, illustrating the dynamic epigraphic culture of that region. The second explores in detail the nature of epigraphic culture in the Roman world, probing the limitations of traditional ways of dividing up inscriptions into different categories, and offering examples of how epigraphic culture developed in different geographical, social and religious contexts. It examines the 'life-cycle' of inscriptions - how they were produced, viewed, reused and destroyed. Finally, the third provides guidance on deciphering inscriptions face-to-face and handling specialist epigraphic publications.

The introduction places the man and his work in context and discusses specific problems of textural arrangement and organization and agricultural practice. There are several drawings to aid appreciation of Cato's descriptions of buildings and equipment. A book of instruction about the cultivation of vines, olives and fruit, the management of slaves and contract labour, the rituals consequent on ownership and even cookery for humans and the pharmacy. Because of its date, the 2nd century BC, it is a particularly important resource for students of Latin and of early Roman society.
The Oxford Handbook of Roman Epigraphy

This book explores how the Graeco-Roman world suffered from major power conflicts, imperial ambition, and ethnic, religious and racist strife.

Illustrated Introduction to Latin Epigraphy

This book, derived from the acclaimed Cambridge Encyclopedia of the World's Ancient Languages, describes the ancient languages of Europe, for the convenience of students and specialists working in that area. Each chapter of the work focuses on an individual language or, in some instances, a set of closely related varieties of a language. Providing a full descriptive presentation, each of these chapters examines the writing system(s), phonology, morphology, syntax and lexicon of that language, and places the language within its proper linguistic and historical context. The volume brings together an international array of scholars, each a leading specialist in ancient language study. While designed primarily for scholars and students of linguistics, this work will prove invaluable to all whose studies take them into the realm of ancient language.

Inscriptions and Their Uses in Greek and Latin Literature

This well-illustrated volume provides the best collection of Etruscan inscriptions and texts currently in print. A substantial archeological introduction sets language and inscriptions in their historical, geographical, and cultural context. The overview of Etruscan grammar, the glossary, and chapters on mythological figures all incorporate the latest innovative discoveries.

Bilingualism and the Latin Language

Through words and images employed both by individuals and by a range of communities across the Graeco-Roman worlds, this book explores the complexity of multilingual representations of identity. Starting with the advent of literacy in the Mediterranean, it encompasses not just the Greek and Roman empires but also the transformation of the Graeco-Roman world under Islam and within the medieval mind. By treating a range of materials, contexts, languages, and temporal and political boundaries, the contributors consider points of cross-cultural similarity and difference and the changing linguistic landscape of East and West from antiquity into the medieval period. Insights from contemporary multilingualism theory and interdisciplinary perspectives are employed throughout to exploit the material fully.

An Introduction to Greek Epigraphy of the Hellenistic and Roman Periods from Alexander the Great Down to the Reign of Constantine (323 B.C.-A.D. 337)

Latin inscriptions can appear daunting - a jumble of letters without any structure or meaning. However, once you know how, most are easy to read as they follow strict rules of grammar and abbreviation. This book will teach readers how to 'decipher' them and will highlight how even the smallest piece of information that an inscription may provide can help classicists and archaeologists to reconstruct the daily life of ordinary Romans. While surviving literature often only relates to the lives of the elite (who could afford books), inscriptions were used by all and meant to be seen by all. Thus, they shed light on the lives of those classes of people less visible in the archaeological record - the poor, slaves and women. Illustrated with the best examples of inscriptions from the British Museum's Roman collection, this book will explore the meaning of putting up public inscriptions and the standardised system of abbreviation that was used to ensure Romans from all areas of the Empire could read them. Written in the simple everyday-life Latin, they also reflect linguistic changes within society, allowing the modern day scholar to uncover the introduction of slang words and new spellings of Latin words. We may also stumble across spelling mistakes, for not everyone knew how to write Latin fluently, and often we find that words had been written phonetically. If the text of the inscriptions can give us one part of the information, often the style of decoration around the inscription, the accompanying images, or the original location can tell us even more. Every aspect of an inscription - its content, the person commissioning the inscription, and thus carried specific meaning, and so combined with the texts of the inscriptions, it is possible to reconstruct pieces of the lives of everyday Romans that were thought most valuable to be remembered.

Bilingualism in Ancient Society

Library of Congress Subject Headings

Library of Congress Subject Headings

By Roman Hands takes Latin out of the textbook and allows students to see and translate Latin as it actually appeared on Roman monuments, walls and tombs. The first collection of entirely authentic and un-adapted inscriptions and graffiti accessible to beginning and intermediate students of Latin, By Roman Hands unites the study of language and culture in a novel and compelling way and at a level that the Latin can be grasped and discussed by early Latin learners. Ranging from a love letter hastily scratched on a Pompeian wall to the proclamation of an emperor's achievements formally inscribed on a monumental arch, these carefully selected texts afford fascinating glimpses into the lives and minds of the Romans, even as they illustrate and reinforce the basic elements of the Latin language. This edition, revised to work in parallel with the second edition of Susan Shelmerdine' s Introduction to Latin or any standard beginning Latin text, includes more texts and illustrations, and an additional section of inscriptions for practice and review.

The Latin Inscriptions of Rome

The Devil Knows Latin

From the archaic period onwards, ancient literary authors working within a range of genres discussed and quoted a variety of inscriptions. This volume offers a wide-ranging set of perspectives on the diversity of epigraphic material present in ancient literary texts, and the variety of responses, both ancient and modern, which they can provoke.

Language and Society in the Greek and Roman Worlds

"Inscriptions are for anyone interested in the Roman world and Roman culture, whether they regard themselves as literary scholars, historians, archaeologists, anthropologists, religious scholars or work in a field that touches on the Roman world from c. 500 BCE to 500 CE and beyond. The goal of The Oxford Handbook of Roman Epigraphy is to show why inscriptions matter and to demonstrate to classicists and ancient historians, their graduate students, and advanced undergraduates, how to work with epigraphic sources".

Living with a Dead Language

Texts written in Latin, Greek and other languages provide ancient historians with their primary evidence, but the role of language as a source for understanding the ancient world is often overlooked. Language played a key role in state-formation and the spread of Christianity, the construction of ethnicity, and negotiating positions of social status and group membership. Language could reinforce social norms and shed light on taboos. This book presents an accessible account of ways in which linguistic evidence can illuminate topics such as imperialism, ethnicity, social mobility, religion, gender and sexuality in the ancient world, without assuming the reader has any knowledge of Greek or Latin, or of linguistic jargon. It describes the rise of Greek and Latin at the expense of other languages spoken around the Mediterranean and details the social meanings of different styles, and the attitudes of ancient speakers towards linguistic differences.

Learn Latin from the Romans

The Devil Knows Latin is a provocative and illuminating examination of contemporary American culture. Its range is broad and fascinating. Whether discussing the
importance of Greek and Latin syntax to our society, examining current trends in literary theory, education, and politics, or applying a classical perspective to contemporary films, Christian Kopff (Professor of Classics at the University of Colorado) is at home and on the mark. He outlines the perils and possibilities for America in the coming decades with learning and verve—demonstrating that the highway to a creative and free future begins as a Roman road.

**Approaches to Greek and Latin Language, Literature and History**

*By Roman Hands*

Lawrence Keppie's book offers the non-specialist a comprehensive and enjoyable guide to understanding the texts of Roman inscriptions, as well as explaining the numerous different contexts in which they were produced. Every area of Roman life is covered, including: the emperor * temple and altars to the gods * imperial administration * grave stones and tomb monuments * local government and society * the army and the frontiers * Christianity * trade, commerce and the economy * the later Roman Empire. For each inscription cited, the book provides the original Latin, an English translation and a commentary on the piece's significance.

Illustrated with more than 80 photos and drawings, this is the ideal introduction to the most important source for the history and organisation of the Roman Empire.

**Epigraphic Evidence**

Learn Latin from the Romans is the only introductory Latin textbook to feature texts written by ancient Romans for Latin learners. These texts, the 'colloquia', consist of dialogues and narratives about daily life similar to those found in modern-language textbooks today, introducing learners to Roman culture as well as to Latin in an engaging, accessible, and enjoyable way. Students and instructors will find everything they need in one complete volume, including clear explanations of grammatical concepts and how Latin works, both British and American orders for all noun and adjective paradigms, 5,000 easy practice sentences, and over 150 longer passages (from the colloquia and a diverse range of other sources including inscriptions, graffiti, and Christian texts as well as Catullus, Cicero, and Vergil). Written by a leading Latin linguist with decades of language teaching experience, this textbook is suitable for introductory Latin courses worldwide.

**Migration, Mobility and Language Contact in and around the Ancient Mediterranean**

Roman Lives, a new edition to the Focus Classical Sources library, is a sourcebook that explores ancient life in all strata of Roman society by examining the epitaphs and other inscriptions in Latin. For departments of Classics at the high school or college level which offer Roman Civilization, Epigraphy, or Roman culture courses.

**The Language of Ruins**

**Palaeohispanic Languages and Epigraphies**

In addition to Phoenician, Greek, and Latin, at least four writing systems were used between the fifth century BCE and the first century CE to write the indigenous languages of the Iberian peninsula (the so-called Palaeohispanic languages): Tartessian, Iberian, Celtiberian, and Lusitanian. In total over three thousand inscriptions are preserved in what is certainly the largest corpus of epigraphic expression in the western Mediterranean world, with the exception of the Italian peninsula. The aim of this volume is to present the most recent cutting-edge scholarship on these epigraphies and on the languages that they transmit. Utilizing a multidisciplinary approach which draws on the expertise of leading specialists in the field, it brings together a broad range of perspectives on the linguistic, philological, epigraphic, numismatic, historical, and archaeological aspects of the surviving inscriptions, and provides invaluable new insights into the social, economic, and cultural history of Hispania and the ancient western Mediterranean. The study of these languages is essential to our understanding of colonial Phoenician and Greek literacy, which lies at the root of their growth, as well as of the diffusion of Roman literacy, which played an important role in the final expansion of the so-called Palaeohispanic languages.
